ABOUT ME

I am a third-year BSc (Hons) Computer Science student at the University of Bedfordshire, building on a solid foundation from a Higher Diploma in Information Technology. I possess hands-on experience in full-stack web development gained through multiple academic projects. Eager to apply strong problem-solving skills and up-to-date technical knowledge in a dynamic development role.

ACADEMIC QUALIFICATIONS

2026 - Present

BSc (Hons) Computer Science
University of Bedfordshire

2024 - 2025

Higher Diploma in Information Technology
SLIIT CITY UNI

2020 - 2023

GCE Advanced Level in Maths Stream
Kalutara Vidyalyaya National School

TECHNICAL SKILLS

Languages

JavaScript
HTML5
CSS3
Java
C++
PHP

Frameworks

Express.js
React.js
Node.js

Database

MongoDB
Supabase
MySQL

Version Control & Tools

Android Studio
IntelliJ IDEA
Postman
Power BI
VS Code
RStudio
GitHub
Figma

SOFT SKILLS

Team work & Collaboration

Adaptability

Problem-Solving & Analysis

Communication

PROJECTS

NS Stores Hardware E-Commerce Platform (MERN Stack - Group)

- Built the complete user authentication flow and reporting system.
- Implemented secure JWT token handling where the backend generated and signed tokens upon login
- Designed dynamic React components that conditionally rendered admin panels, user dashboards, and navigation menus based on decoded JWT payloads (user roles).
- Created React charts (using libraries like Chart.js or Recharts) to visualize sales and inventory analytics fetched via secured REST APIs. Implemented frontend filters and date-range selectors for customizable report generation.
- Secured password storage on the backend using bcrypt hashing with salt rounds.

Hospital Management System (Java, IntelliJ IDEA - Group)

- Designed and implemented inventory tracking, automated low-stock alerts, and integrated medicine dispensing with patient records for pharmacy inventory management module.
- Applied OOP principles, designed MySQL database schemas, and wrote JDBC queries for efficient data retrieval.

Web Technologies Portfolio (Bootstrap, jQuery, REST APIs)

- Created a responsive website implementing modern front-end technologies learned in coursework.
- Integrated REST APIs for dynamic content, used jQuery for DOM manipulation and animations, and employed Bootstrap for mobile-first responsive design with advanced components.
- Built interactive data tables with sorting/filtering and implemented form validation with JSON data handling.

Country Flag Finder Game (Android Studio)

- Implemented game logic, score tracking, and a clean UI following Material Design principles.
- Managed application state and used Android SDK components for a smooth user experience.

LICENSES & CERTIFICATIONS

- Relational Database Design - freeCodeCamp (2026 - January)
- Front End Development Libraries Certification - freeCodeCamp (in progress)
- Full Stack Web Development Certificate Course - SKYREK Pvt Ltd. (in progress)
