PROFESSIONAL SUMMARY

Third-year BSc (Hons) Computer Science undergraduate with strong hands-on experience in full-stack web development using React.js, Node.js, Express.js, .NET Core, and MongoDB. Experienced in designing secure REST APIs, authentication systems, and database-driven applications through academic and group projects. Recently built an end-to-end CI/CD pipeline using Docker, Terraform, and GitHub Actions, deploying a containerized ASP.NET Core API to AWS EC2. Proficient in version control with Git, test automation using Selenium and Postman, and building responsive, role-based web applications. A curious problem-solver committed to writing clean, testable, and maintainable code. Passionate about learning new technologies and collaborating in fast-paced, innovative environments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C#, PHP, C++, Python (Learning)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, ASP.NET Core, REST APIs

Databases: MongoDB, MySQL, PostgreSQL, Supabase

DevOps & Cloud: Docker, Terraform, GitHub Actions, AWS EC2, Vercel

Testing: Selenium WebDriver, Postman, Manual Testing

Tools & Practices: Git, GitHub, CI/CD, Infrastructure as Code, Linux, Agile

PROJECT EXPERIENCE

Smart Tech Store – MERN Stack E-Commerce Web Application

Live Demo : <https://mern-project-frontend-m2ik.vercel.app>

- Developed and deployed full MERN stack application using React.js, Node.js, Express.js, and MongoDB
- Managed environment-based configuration for frontend deployment on Vercel and backend on Render
- Built and tested RESTful APIs for reliable client-server communication
- Implemented JWT authentication and role-based access control
- Used Git and GitHub for version control and project collaboration
- Performed API validation using Postman and automated UI testing using Selenium
- Handled debugging, error handling, and data validation for stable application behavior

NS Stores Hardware – MERN Stack E-Commerce Platform (Group)

- Implemented complete user authentication and reporting system using MERN stack
- Developed, tested, and validated secure backend REST APIs using Postman for multiple user roles
- Collaborated using GitHub version control in a team-based MERN project
- Performed Selenium automation testing for critical user flows
- Assisted in debugging and maintaining reliable data flow between frontend and backend

Hospital Management System – Java & MySQL (Group)

- Designed pharmacy inventory management module with low-stock alert system
- Created MySQL database schemas and wrote optimized JDBC queries
- Applied OOP principles for modular and maintainable code structure
- Tested database operations and validated data integrity through query testing

DevOps Pipeline – Docker, Terraform, GitHub Actions, AWS

- Built a REST API with ASP.NET Core and containerized the application using Docker
- Managed infrastructure as code with Terraform to provision AWS resources
- Automated build, test, and deployment using a CI/CD pipeline with GitHub Actions
- Pushed Docker images to Docker Hub and deployed the container on an AWS EC2 instance
- Debugged container networking and deployment issues using docker logs and AWS CLI, ensuring zero-downtime deployments

EDUCATION

BSc (Hons) Computer Science (2026 – Present)

University of Bedfordshire (Delivered at SLIIT, Sri Lanka)

Higher Diploma in Information Technology (2024 – 2025)

Sri Lanka Institute of Information Technology (SLIIT)

GCE Advanced Level – Science Stream (2020 – 2023)

Kalutara Vidyalaya National School
